Profile

I'm an aspiring Computer Science engineer, currently in Third Year, seeking an opportunity to intern at a reputed company this summer. I have a keen interest in Machine Learning, data analysis and data visualization. I am looking for an opportunity to exhibit my skills and gain vast experience.

Personal Projects

- **Database Management Systems Project:** Developed a Movie Ticket Booking System to keep a track of currently running movies in theatres. A user interface was created using Java with back-end databases in MySQL.
- **Software Development Project:** 'College Selector' App. Developed an Android Application for helping students get a better understanding of their interest in a field. An aptitude test regarding the same was included in the app. The aim was to help students gain a better understanding of the colleges they might get into, based on their scores. We took input of the scores and provided college lists accordingly.
- **KPMG Virtual Internship:** Performed Data Analysis and Visualization using Power BI software to prepare effective and accurate Dashboards. Drafted Data quality issues and strategies to mitigate these issues. Prepared presentations on understanding different trends in data.
